

Hydrate

Hydrotone Lite/Hydrotone/Hydrotone Max

Product Description:

These non-glycolic creams lock in moisture and provide the perfect level of hydration to balance the exfoliating effects of the renewing products. Three levels of hydration to satisfy every skin type.

Skin Types:

Hydrotone Lite - Developed for normal to oily skin. A light-weight, non-greasy, formulation that leaves skin feeling satin-soft.

Hydrotone - Developed for normal to dry skin. A concentrated, emollient-rich cream that leaves skin feeling and looking soft and supple.

Hydrotone Max - Developed for extremely dry skin. A super-enriched cream that provides intense hydration for extremely dry skin. Seals in moisture to restore a soft, velvety complexion.

Benefits:

- Complements the skin's protective acid mantle.
- Balances the exfoliating effects of the renewing products.

AM Moisturizer Directions:

Apply sparingly to clean skin. Allow to absorb before applying make-up.

Note: Before applying Hydrotone Max, massage cream between fingers top for 10–15 seconds to warm product and enhance application.

Featured Ingredients:

Carthamus Tinctorius (Safflower Seed Oil) - Provides natural hydration.

Citrus Medica Limonum (Lemon) Fruit Extract - Clarifies the skin, has anti-inflammatory properties and is a natural source of Vitamin C.

Hydrotone and Hydrotone Max Only

Mineral Oil - Soothes and softens the skin, enhances epidermal barrier function and locks-in moisture to maintain hydration.

Petrolatum - Penetrates the stratum corneum to improve barrier recovery, hydrates by locking in moisture, soothes and softens the skin.

Hydrotone Lite, Hydrotone, Hydrotone Max

Hydrate (continued)
